RE: Approved Training Provider #21 Approval

Dear Monica:

Thank you for submitting your application form to become an Approved Training Provider (ATP) for Montana Continuing Education Credits (CECs). The Operator Certification Office has determined that your organization's goals and types of training are applicable for water and wastewater operators in Montana.

The 360water Program has been approved as an ATP for the upcoming CEC biennium (June 1, 2020 through May 31, 2022) for the training that will be provided to certified operators. Please refer to your guidelines for information that must be followed (but not limited to) to determine if the training is appropriate, determine the correct number of CECs for each training session, notify the certification office of all approved training, review and verify each CEC form for accuracy and completeness, mail the completion forms to the certification office in a timely manner, and meet all deadlines.

We appreciate your dedication to providing quality training to Montana's operators.

Should you have any questions or need further information, please contact me.

Sincerely,

A handwritten signature in blue ink that reads "Reta".
